Silvia Steila

My name is Silvia Steila and I'm a second year student of a master in Mathematics at University of Turin.

I finished my three-year degree in July 2010 with a thesis in Commutative Algebra about conchoidal transform of curves and surfaces.

I'm graduating this summer with a thesis in set theory and graph theory about smooth graphs, so I'm studying some articles on this argument. My supervisor is Prof. Alessandro Andretta. Now I'm attending a course in set theory held by Dott. Matteo Viale and Prof. Alessandro Andretta.
