

POSTDOC POSITION FOR 2023

Université Lyon 1
funded by the ERC project Vortex

Applications are invited for a postdoctoral fellowship in probability/mathematical physics at the University Lyon 1, in the Laboratoire *Institut Camille Jordan* (<http://math.univ-lyon1.fr/?lang=en>). The postdoc is funded by the **ERC grant “Vortex”** (*Spin systems with discrete and continuous symmetry: topological defects, Bayesian statistics, quenched disorder and random fields*).

Main research areas include: Villain and XY model, Coulomb gas, Berezinskii-Kosterlitz-Thouless transition, lattice gauge theory, Gaussian Free Field, Ising and dimer models, percolation, localisation and delocalisation of interfaces, classical Heisenberg model, planar statistical physics.

Practical informations:

- The position is for two years (with a possible extension to a third year), with a salary of approx. 38000 per year (between year 0 and 3 after PhD) and approx. 50000 euros per year (between year 3 and 7 after PhD). For 38kE, it corresponds approx to 2400 euros/month after all taxes. For 50kE, it corresponds approx to 3000 euros/month after all taxes.
- Considerable financial support to attend conferences, workshops and invite collaborators will be granted. (Approx 5000 euros/year).
- No teaching.
- A lot of activity around probability in Lyon. See [Probability team, Lyon 1 \(in french\)](#) or [Probability team in nearby ENS Lyon](#).
- Great city :-)
- The expected starting date is September 2023, but a different date may be arranged.

Application and deadline.

Applications including a CV, a list of publications and a (approximately) three-pages description of research interests should be sent by email to Christophe Garban: christophe.garban@gmail.com before **January 11th, 2023**.

Applicants should also arrange for up to three letters of recommendation to be sent to the same address.

They will be evaluated first on January 12th, 2023 and then on a rolling basis.

Contacts. (*all members of the ERC project Vortex*).
