

# Types Of Angles

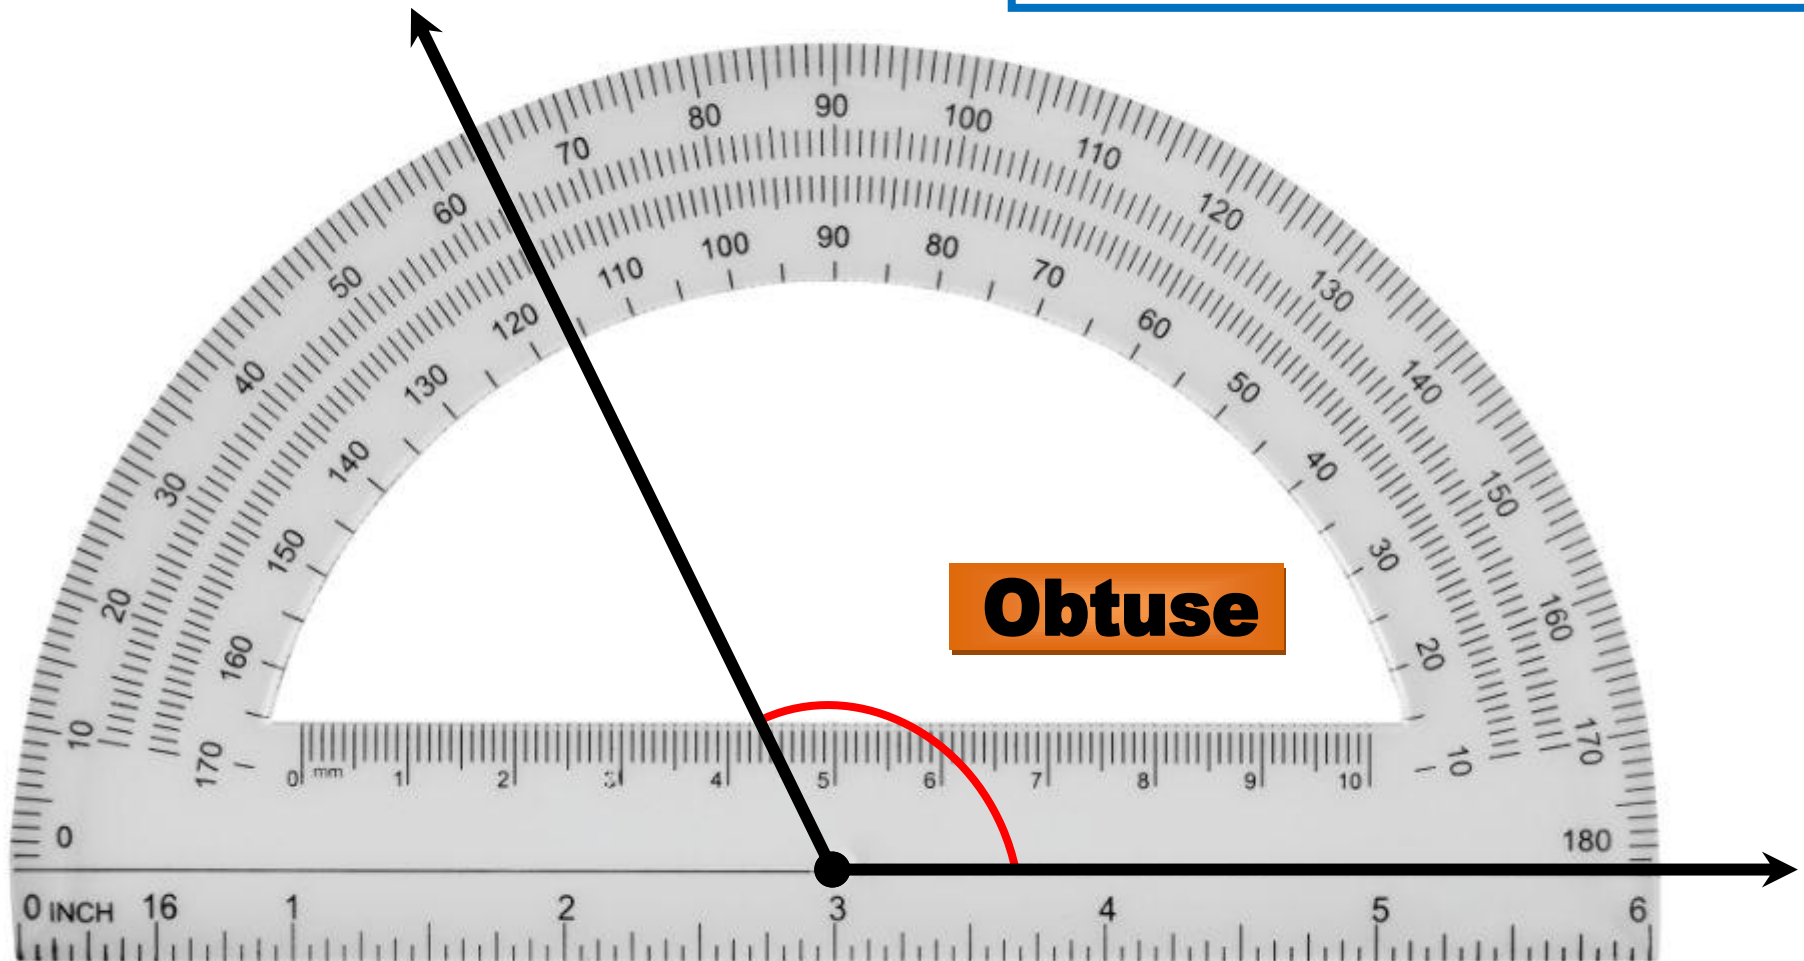

1

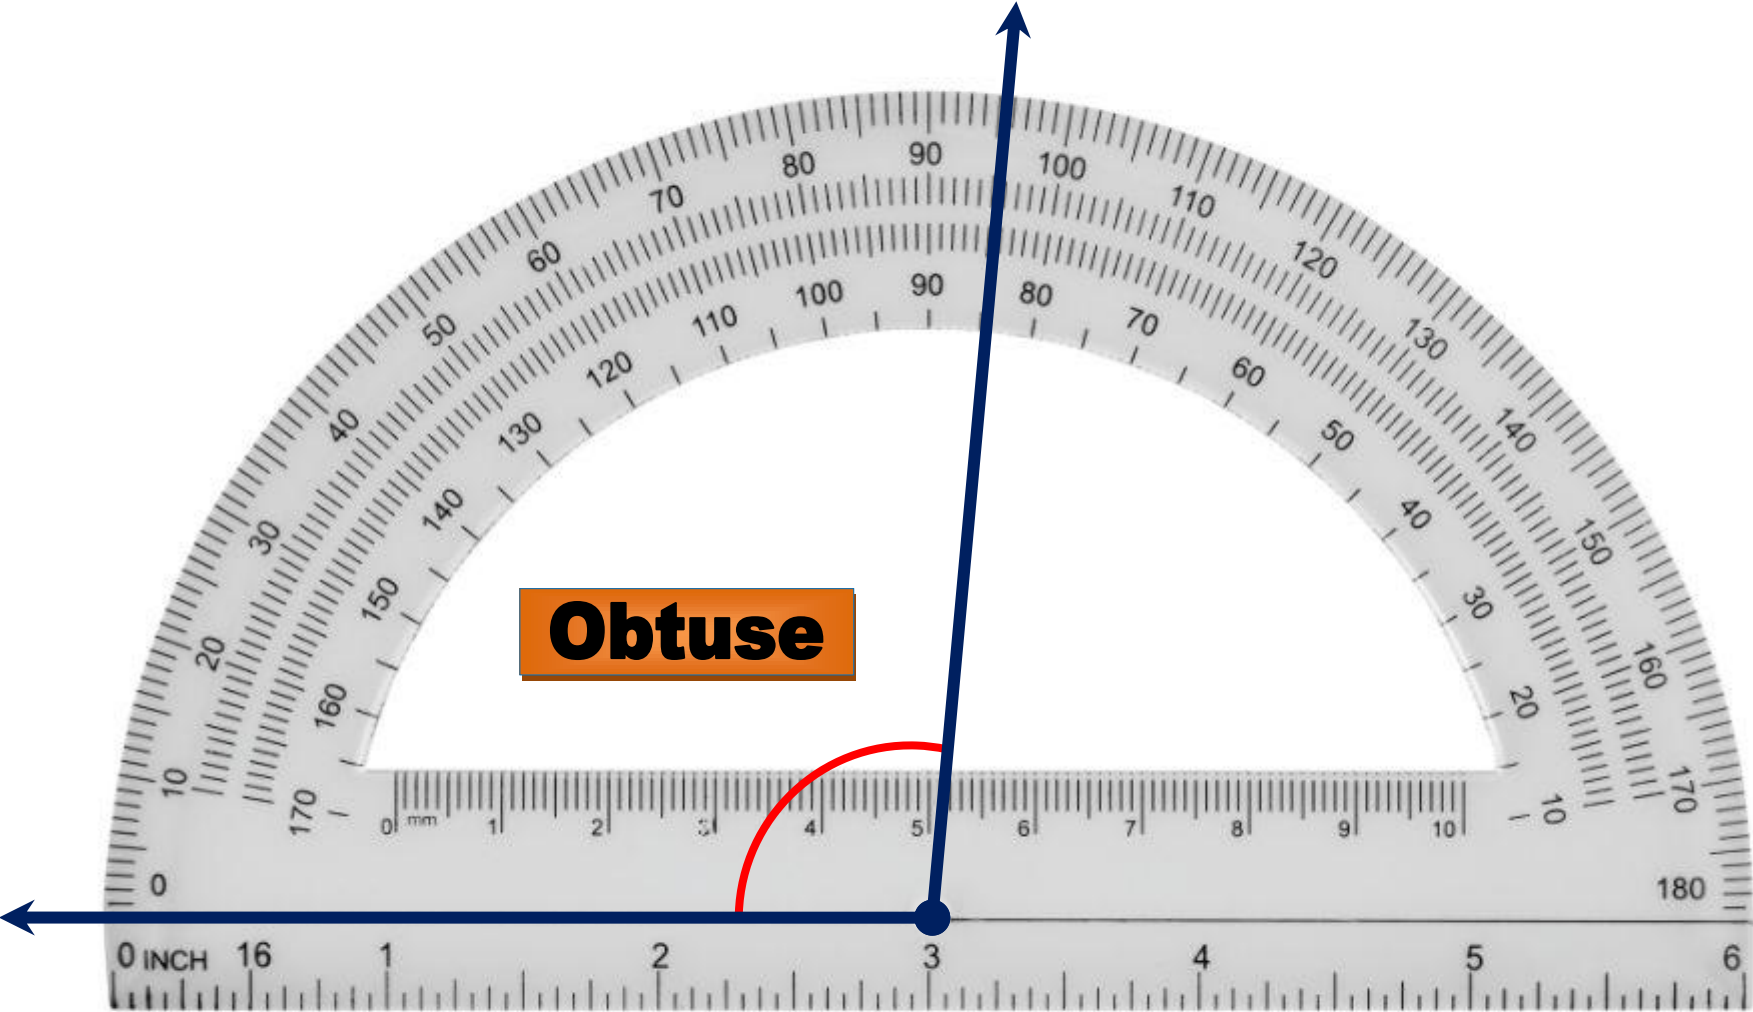

An angle that is LESS THAN 90° is called an ACUTE ANGLE.

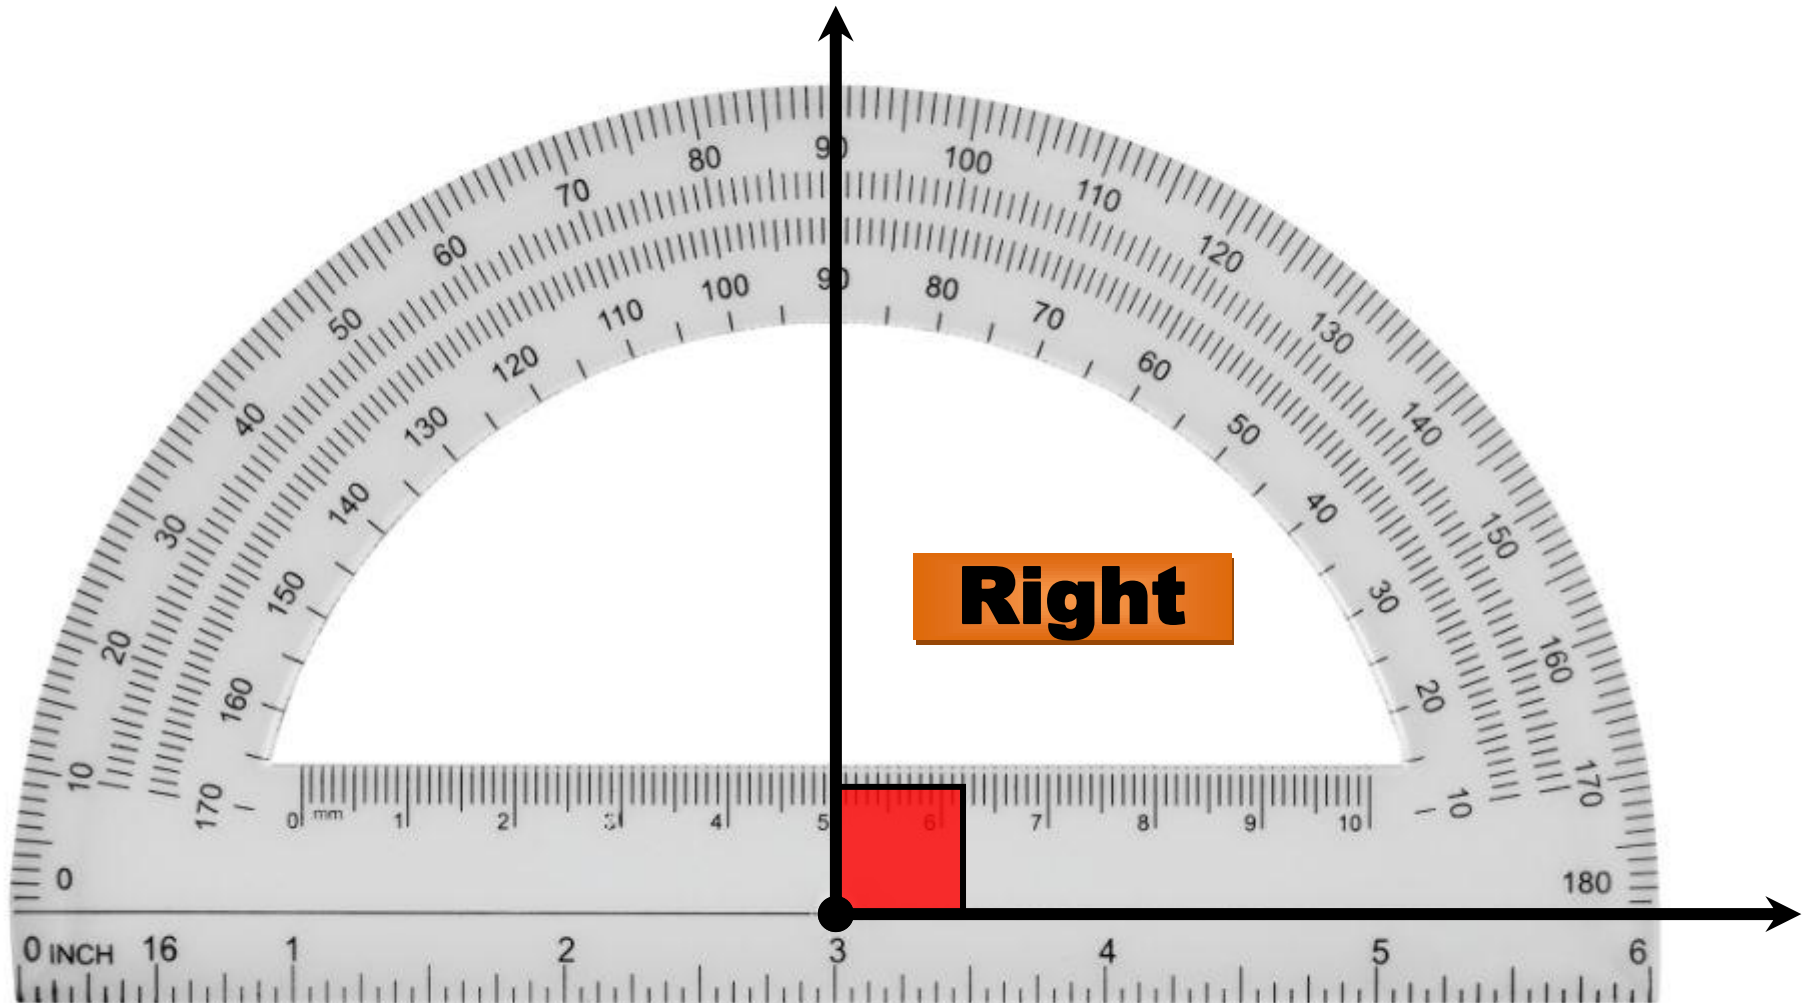

An angle that is **BETWEEN  $90^\circ$  and  $180^\circ$**  is called an **OBTUSE ANGLE**.

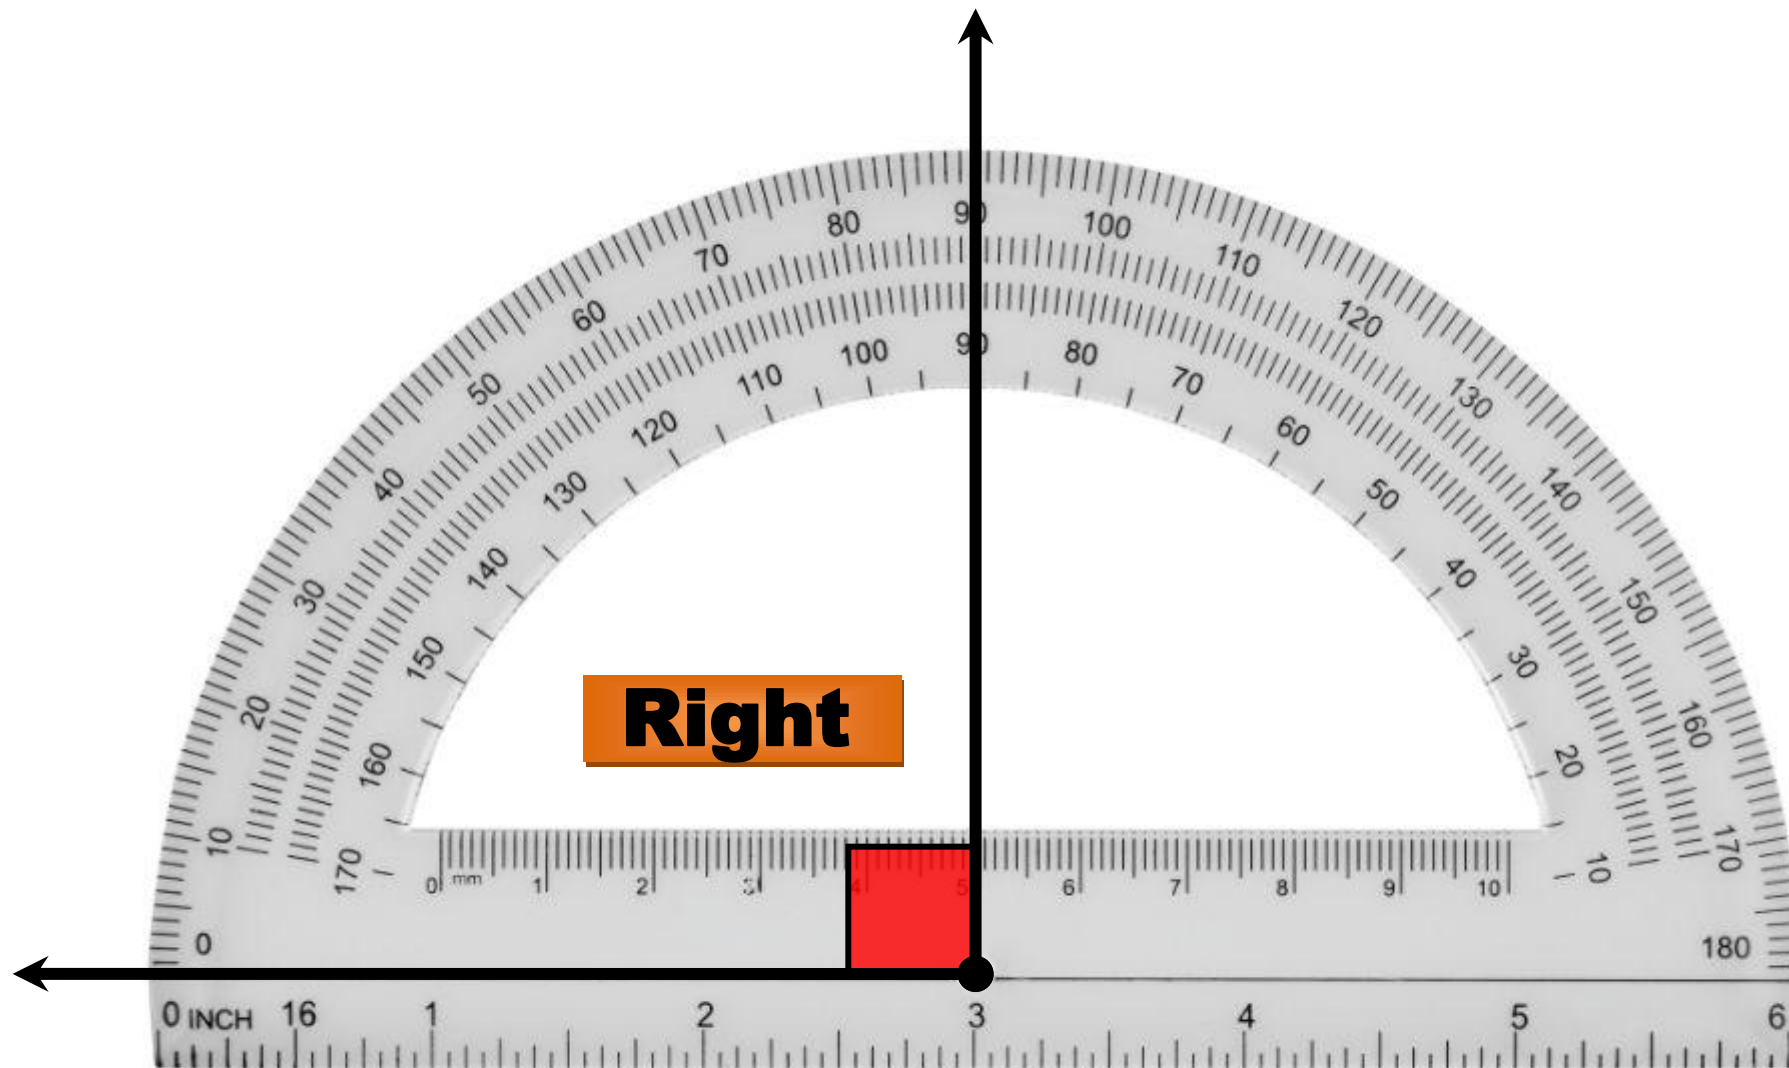

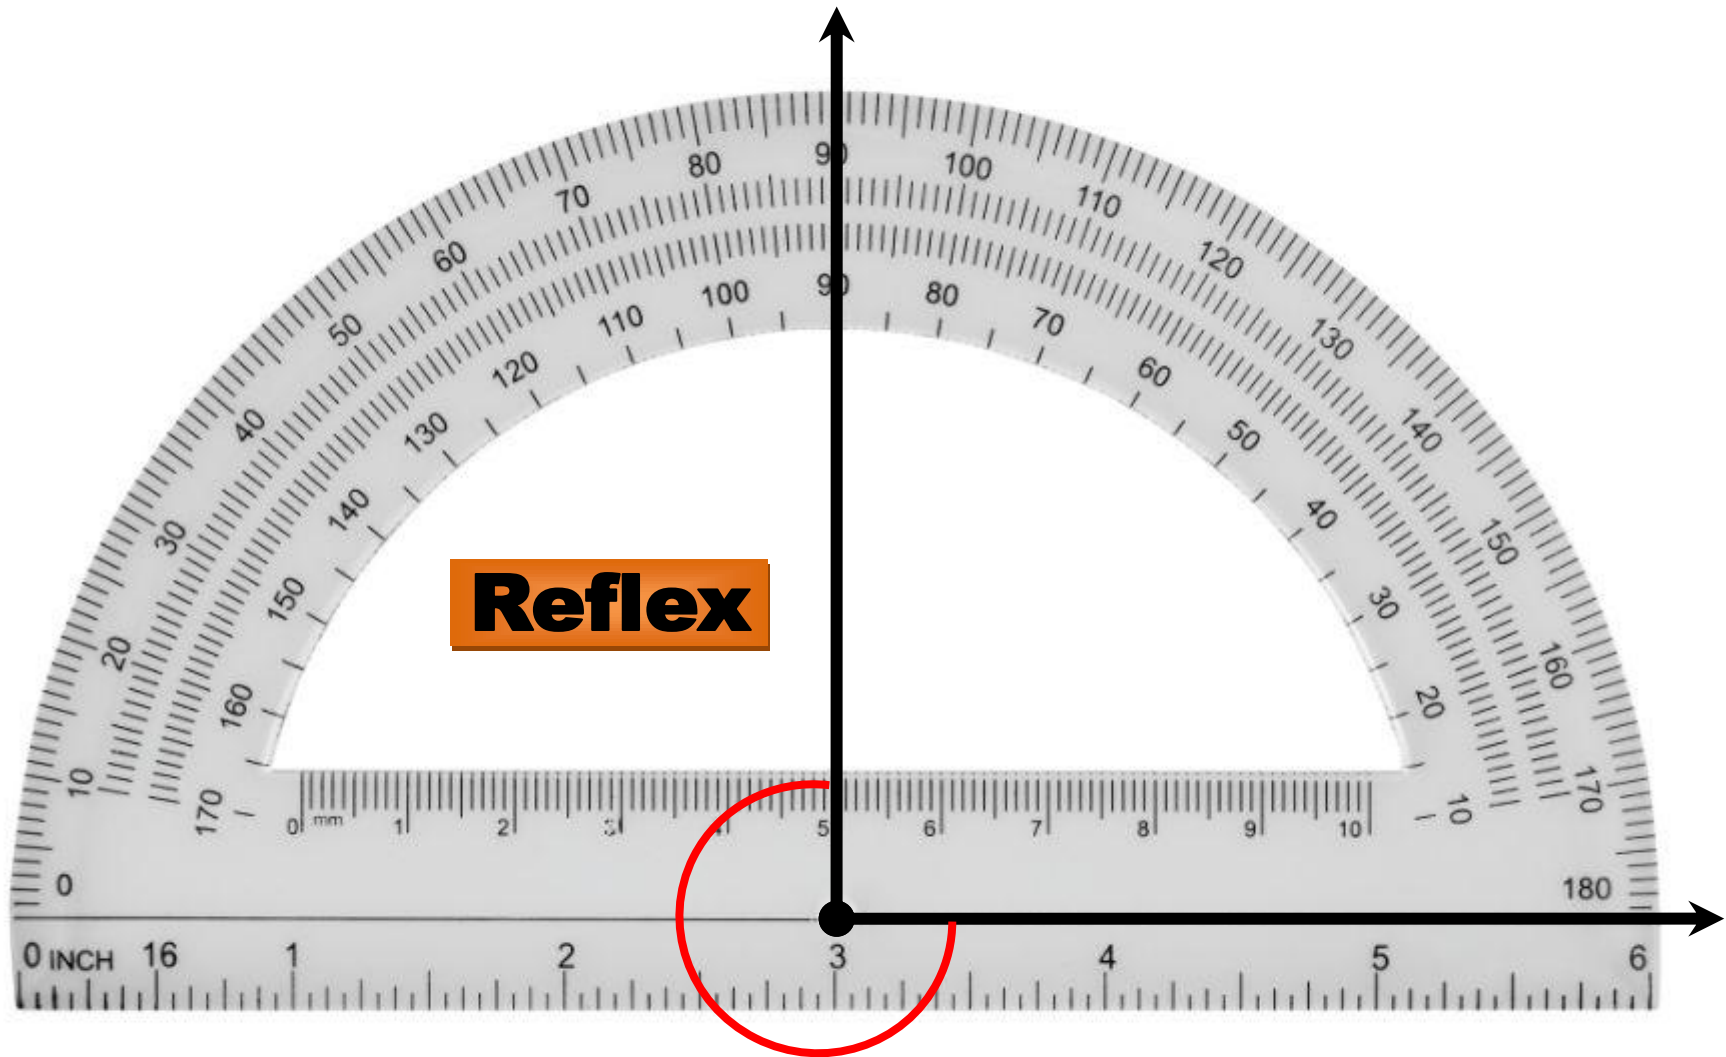

**A  $90^\circ$  angle is called an RIGHT ANGLE. A little square is used to indicate a right angle.**

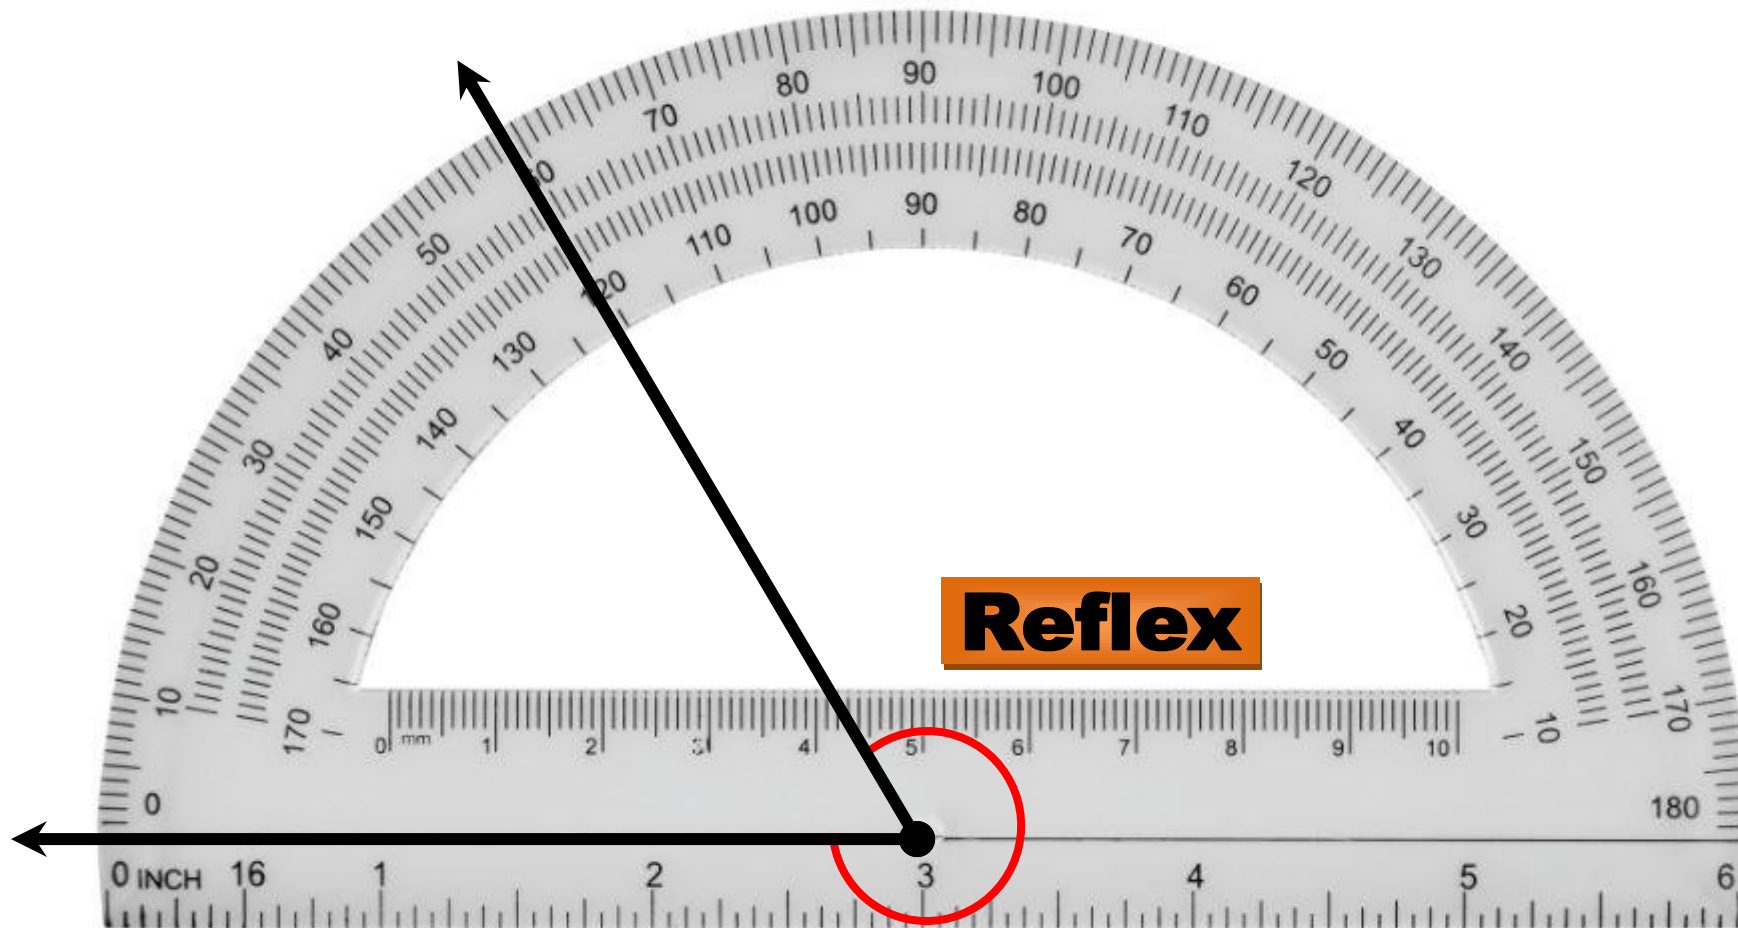

**An angle that is BETWEEN  $180^\circ$  and  $360^\circ$  is called a REFLEX ANGLE.**

**Let's name these angles.**
