

Les 240 "CUBE SOMA"

Les pièces du Cube Soma (Pietr Hein) ci-dessous peuvent être assemblées en un cube d'arête 3.
Il existe 240 façons différentes de le faire.

Quelques observations :

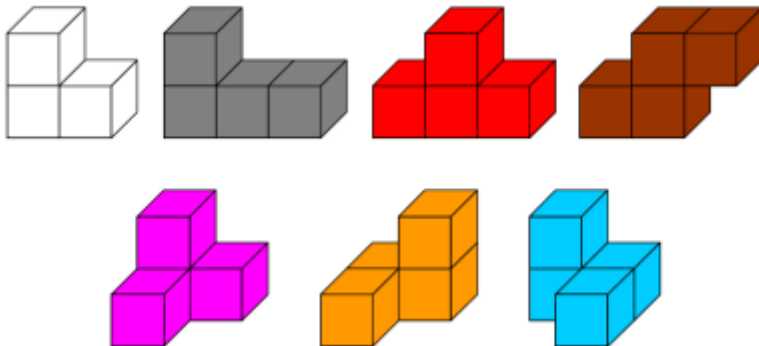

Le "T" rouge, est toujours sur une arête du cube, jamais au milieu d'une face ni au centre du cube.

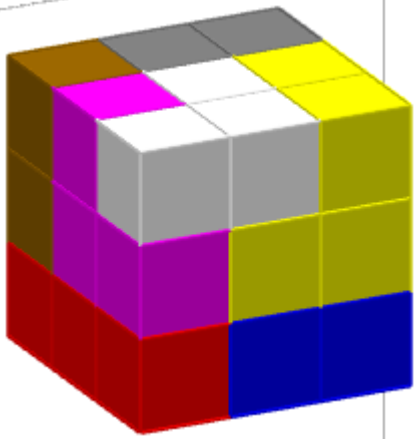

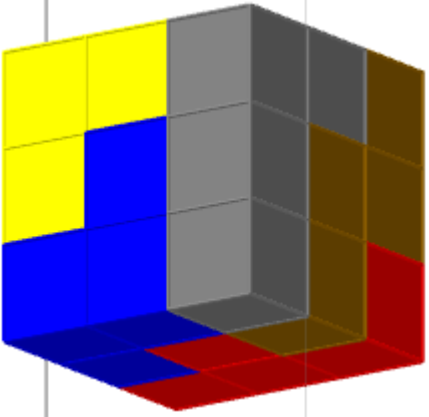

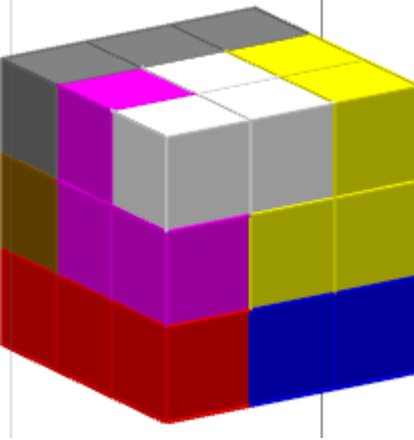

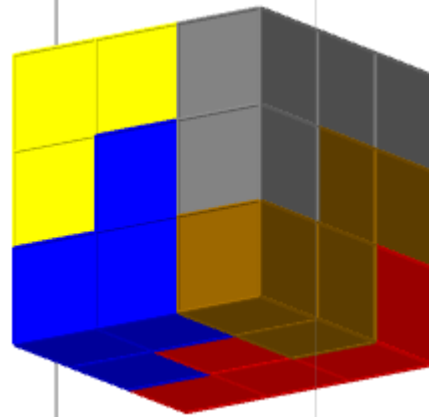

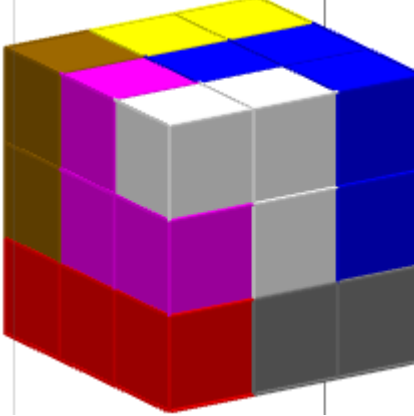

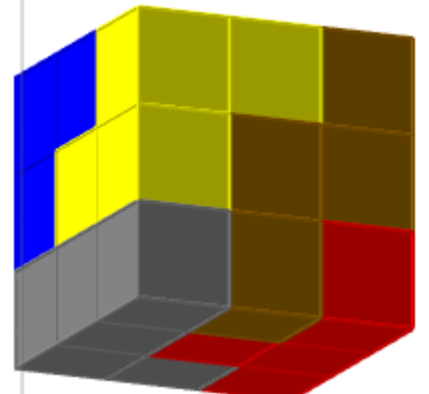

Le "Y" rose a un cube à la base de ses trois "branches", ce cube-base se situe soit au sommet du cube (203 fois) , soit au milieu d'une face (solutions 1 à 10 et 157 à 183 soit 37 cas différents)

Le petit "L" blanc a un cube de base (en contact avec les 2 autres cubes blancs) qui se situe :

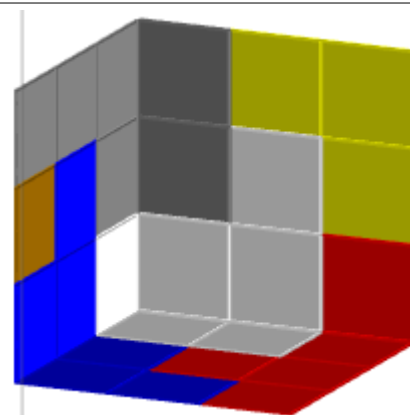

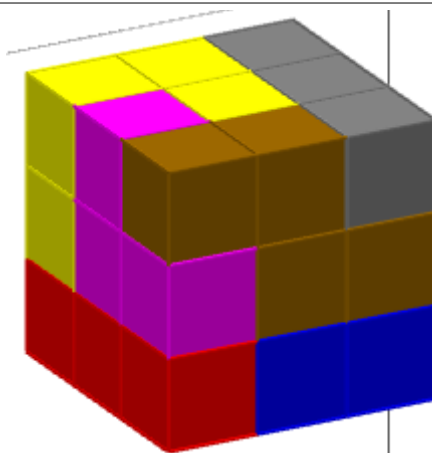

- au milieu d'une arête (223 cas)
- au centre du cube (17 cas : n°18,19,62,63,73,101,102,115,119,184,193,196,210,211,226,234,238)

De ces observations on pourra sans en tirer des éléments de parité si on colorie le cube en alternance de 2 couleurs.
